Apacer's new Audio Steno AU581

IZDRUKĀT NOSŪTĪT

An MP3 player with chic metallic look! Blending music and fashion with the Audio Steno AU581.

Searching for an MP3 player with a modern yet fashionable appearance?

Apacer's new Audio Steno AU581 MP3 player makes startling impressions and delivers total listening satisfaction. Apacer Technology Inc., a global leader in memory modules and digital storage, today announced the release of its Audio Steno AU581 MP3, which blends music and fashion into one. Its unique dual color mirror coating and streamlined design adds luxury and fashion, while letting you listen to hundreds of songs. The glimmering chic metallic look of the AU581 twinkles and sparkles around you, while its blue crystal finish tranquilizes attention directly to you. The elegant OLED display, which is brighter and clearer than the normal LCM display, also enhances your modish, on-pitch appearance.

According to Apacer's Product Director, C.K. Chang, "The AU581 brings not just the joy of perfect music reproduction but also a token of fashion. It delivers the "original sound" in an enjoyable and easy to use MP3 player. Its high-sensitivity lanyard earphones are equipped with large 15mm Neodymium Magnet Mylar units which deliver the heart of superior wide stereo sound, and the high definition treble and powerful bass." The AU581 features a 7-mode EQ hot key, which perfectly delivers the "original sound" of Pop, Rock, Classical, Jazz, Bass, Treble, and Normal. The direct record button on the left side of this MP3 player captures what matters to you with on-demand voice recording, and what you like with synchronous FM recording.

The AU581 completes perfection with a high-performance FM radio storing up to 20 of your favorite channels, a high-sensitivity microphone for voice recording, a high-energy built-in
