Apacer unveils new MP3 player

Apacer's latest audio steno AU581 MP3 player is fashionable enough to walk the ramp

Oct 24, 2007

 print this page  send to friends

Apacer has announced the launch of its latest Audio Steno AU581 MP3 player, which is a good blend of form and function. It sports a dual color mirror coating and streamlined design that further accentuates your pleasure of listening to music. Further on, its sparkling stylish metallic outlook of the AU581 twinkles and sparkles around you while its blue crystal finish directly makes you the centre of attention and perhaps envy too!

The Audio Steno AU581 MP3 player is also loaded with some interesting features such as an elegant OLED display that is brighter and clearer than most other LCM displays.

Apacer's new MP3 player also features an interesting 7-mode EQ hot key, which delivers the "original sound" of Pop, Rock, Classical, Jazz, Bass, Treble, and Normal. The AU581 incorporates a Direct Record button on the left side that helps you capture all that's important, thanks to its on demand voice recording, and what you like with synchronous FM recording.

Its high-performance FM radio has the capacity to store up to 20 of your favorite channels, a high-sensitivity microphone for voice recording, a high-energy integrated rechargeable Lithium-Polymer battery for hours and hours of listening pleasure, and 12-language support. The Apacer Audio Steno AU581 MP3 player's built-in flash memory capacity is available in 2 GB and 4 GB.
