Apacer Technology announced the release of its Audio Steno AU581 MP3 which has dual color mirror coating and streamlined design. It has a chic metallic outlook and an OLED display.

It has lanyard earphones that are equipped with 15mm Neodymium Magnet Mylar units and also features a 7-mode EQ hot key which delivers better sound. The Direct Record button on the left side of this MP3 player captures what you want with on demand voice recording, and what you like with synchronous FM recording.

The AU581 completes perfection with a high-performance FM radio storing up to 20 of your favorite channels, a high-sensitivity microphone for voice recording, a high-energy built-in rechargeable Lithium-Polymer battery for hours and hours of listening pleasure, and 12 language support. The built-in flash memory capacity for the AU581 is available in 2GB and 4GB.
