Apacer has announced the launch of its latest Audio Steno AU581 MP3 player which is the perfect amalgamation of music and fashion. It sports a dual color mirror coating and streamlined design that further accentuates your pleasure of listening to music. Further on, its sparkling stylish metallic outlook of the AU581 twinkles and sparkles around you while its blue crystal finish directly makes you the centre of attention and perhaps envy too!

Apacer's Product Director, C.K. Chang stated, "The AU581 brings not just the joy of perfect music reproduction but also a token of fashion. It delivers the 'original sound' in an enjoyable and easy to use MP3 player. Its high-sensitivity lanyard earphones are equipped with large 15mm Neodymium Magnet Mylar units which deliver the heart of superior wide stereo sound, and the high definition treble and powerful bass."

The Audio Steno AU581 MP3 player is also loaded with some interesting features such as an elegant OLED display that is brighter and clearer than most other LCM displays.

Apacer's new MP3 player also features an interesting 7-mode EQ hot key which delivers the "original sound" of Pop, Rock, Classical, Jazz, Bass, Treble, and Normal. The AU581 incorporates a Direct Record button on the left side that helps you capture all that's important, thanks to its on demand voice recording, and what you like with synchronous FM recording.

Its high-performance FM radio has the capacity to store up to 20 of your favorite channels, a high-sensitivity microphone for voice recording, a high-energy integrated rechargeable Lithium-Polymer battery for hours and hours of listening pleasure, and 12-language support. The Apacer Audio Steno AU581 MP3 player's built-in flash memory capacity is available in 2GB and 4GB.
