### Apacer introduces the new miniSDHC 4GB memory card to fulfill high-capacity storage needs of mobile devices

Apacer Technology Inc., a global leader in memory module and digital storage, announce today the SD2.0 (SD High Capacity) compliant miniSDHC 4GB memory card. The new SD2.0 specification has the prescribed specifications of SD cards with a capacity range from 4-32GB

Apacer miniSDHC 4GB memory card contains all the features and performances of a standard SDHC memory card at a smaller size, perfect fit into the slim and lightweight mobile device. The super high-capacity of 4GB can meet your needs for mass storage anywhere and anytime, and can store about 1024\* songs in MP3 format, over 1200\*\* high-resolution pictures, or 17\*\*\* hours of movie files (MPEG4). Together with the standard SD card adaptor, the Apacer miniSDHC 4GB memory card supports any equipment using SD2.0 memory cards, such as Nikon 80D, Casio Exilm-Z1000/Z600/S600, and Panasonic DMC-L1 digital cameras and Panasonic SDR-S200 digital video cameras, PDA, MP3 players and mobile phones.

Apacer miniSDHC 4GB is also equipped with the Error Correcting Code (ECC) feature that automatically detects and corrects errors. By enhancing the average use of each memory block on the card extends the life of the product. Apacer Technology insists on using original factory chips for all memory products and lead-free processes ensuring excellent performance and environmental protection.
