Apacer Technology has unveiled Audio Steno AU840 portable music player in India. The new AU840 is a mobile multimedia center as it not only supports music files but also video clips, e-book and digital photo.

Its 2.2-inch color TFT screen allows users to view photos and videos. Besides, the dual earphone output jacks and speakers deliver outstanding sound quality.

AU840's powerful video decode engine allows the device to play at the speed of up to 20 frames per second.

To store multimedia files and e-book the AU840 is equipped with 2 GB or 4 GB of memory.

Apart from utility features, the AU840 also possesses stylish look. Its leather finished body gives perfect urban look to the player.

Apacer's Product Director, C.K. Chang said," the development concept of AU840 comes from sharing multimedia program between people. As more and more popularity of digital device applications, people are used to storing their precious moment in digital formats to share with others conveniently. However, the most MP3 or MP4 players nowadays are made for single user only. From now on, the new AU840 is going to help people share their digital life with their friends."

Apacer's AU840 Multi Media Center will soon be available in the Indian market.
