Apacer Technology has introduced the fourth generation CompactFlash [memory card](#) called the Photo Steno Pro IV 300X CF. The new card is targeted at professional photographers and cameramen.

The 300X [CF card](#) features a highly compatible high-performance controller and advanced file management ability at faster data transferring rate. Thanks to Apacer's Wear Leveling [Technology](#), the new memory card rates longer life.

Furthermore, the card features read rate of 47MB/sec and write rate of 36MB/sec.

The card also includes error-correcting codes (ECC) feature that enables auto-detection and auto-correction of errors. Also the Photo Steno Pro IV 300X CF card that uses the CF4.0 specification and original SLC [flash memory](#) (single-level cell) delivers outstanding performances. Hence it allows taking high-resolution photos.

The Photo Steno Pro IV 300X CF is available in the capacities of 4GB and 8GB.
