

## **Apacer's Handy Steno Flash Drive**

Apacer's new Handy Steno flash drive, the AH123 is claimed to be one of the smallest USB drives in the world with great styling and a vivid, metallic blue color, which is easy to use and users can carry around or attach to key chains and cell phones. With the Apacer Compression Explorer (ACE), the AH123 has the ability to fit up to 10 GB of flash storage into a small device.

The AH123 is only 5 mm thick, with ability to fit in the tightest jeans pockets, wallets, and purses. The AH123 includes a plastic carry strap and its compact design makes the AH123 easy for anyone to insert and remove from a USB slot. The bright blue LED clearly shows data transfer.
