

Apacer introduces the new miniSDHC 4GB memory card to fulfill high-capacity storage needs of mobile devices

Apacer Technology Inc., a global leader in memory module and digital storage, announce today the SD2.0 (SD High Capacity) compliant miniSDHC 4GB memory card. The new SD2.0 specification has the prescribed specifications of SD cards with a capacity range from 4-32GB.

Apacer miniSDHC 4GB memory card contains all the features and performances of a standard SDHC memory card at a smaller size, perfect fit into the slim and lightweight mobile device. The super high-capacity of 4GB can meet your needs for mass storage anywhere and anytime, and can store about 1024* songs in MP3 format, over 1200* high-resolution pictures, or 17* hours of movie files (MPEG4). Together with the standard SD card adaptor, the Apacer miniSDHC 4GB memory card supports any equipment using SD2.0 memory cards, such as Nikon 80D, Casio Exilm-Z1000/Z600/S600, and Panasonic DMC-L1 digital cameras and Panasonic SDR-S200 digital video cameras, PDA, MP3 players and mobile phones.

Apacer miniSDHC 4GB is also equipped with the Error Correcting Code (ECC) feature that automatically detects and corrects errors. By enhancing the average use of each memory block on the card extends the life of the product. Apacer Technology insists on using original factory chips for all memory products and lead-free processes ensuring excellent performance and environmental protection.

Sony's DAV-IS10 Micro Home Theater System
Simplicity, Style and an Automatic Multi-Channel Surround Sound from Speakers

Sony India announced the launch of the DAV-IS10 micro home theater system,. The 5.1 channel home-theater-in-a-box (HTIB) system includes five tiny speakers (the size of a golf ball) along with a subwoofer and a DVD/CD player that offers 550 watts of power. The DAV-IS10 home theater system incorporates Sony's Digital Cinema Auto Calibration(D.C.A.C.), which provides a balanced sound and BRAVIA Theatre Sync-compatible (HDMI-CEC) technology, which uses HDMI to connect compatible TVs to the home theater system, so you just need one remote. The home theater's DVD player can also upscale DVDs to 720p or 1080i resolutions when connected with an HDMI cable to an HDTV.

The Sony DAV-IS10 is designed to cut down on cluttered hand operation and makes for a sleek, stylish and simple to use mechanism. At the heart of the system, is the gloss-black control center, combining DVD/CD/MP3 player with surround processing and an FM/AM radio tuner. The DVD/CD unit also features touch sensitive controls that illuminate and disappear on touch without using the included universal remote control.

With the DAV-IS10 , Sony has built a fully-featured HTIB into an ultra-compact form factor that delivers superb surround sound in a very small form factor . DAV-IS10 will be available at select Sony stores across the country priced at Rs. 39,990/-
