Apacer Technology announced its new product lineup of high capacity flash memory cards starting with a 4GB microSDHC in a class 6 speed rating, while 8GB microSDHC is scheduled to launch in 2008 Q1.

Apacer offers a complete lineup of mobile cards, microSD and microSDHC cards ranging from 1GB to 8GB. An 8GB microSDHC card is capable of storing around 2,048 digital songs, more than 2,400 high-resolution pictures, or up to 34.3 hours of high-quality MPEG 4 video. Their mammoth capacity and performance let you enjoy various media applications on-the-go, without ever running out of memory.
