Apacer Photo Steno Pro IV 300X CF Card

Apacer Technology's fourth-generation CompactFlash memory card, the Photo Steno Pro IV 300X CF card, is for professional cameras. Currently, the capacities are available in 4GB and 8GB, with 16GB expected to be released soon. Apacer 300X CF card is equipped with a highly compatible high-performance controller and advanced file management ability at a faster data transferring rate. The card claims longer life via Apacer exclusive "Wear Levelling Technology".

It's also included with an error-correcting codes (ECC) feature for auto-detection and auto-correction of errors. These features contribute to the what Apacer says is excellent read/write performance of Apacer 300X CF card (read at 47MB/sec and write 36MB/sec) which can support for UDMA mode on high-level digital cameras. The Apacer Photo Steno Pro IV 300X CF card is $155 for the 4GB and $290 for the 8GB. For more information
