

Product : DDR3

The screenshot shows the PC World website interface. At the top, there is a red banner with the 'pc world' logo and the tagline 'Your guide to the best in tech'. To the right of the logo is an Intel Core 2 Duo 'inside' logo. Further right, the text 'Sleek and S' is visible. Below the banner is a navigation bar with buttons for Home, Reviews, Buying Guides, Mobile, Broadband, IT Jobs, PC World Business, and Video. On the left side, there is a 'Site Menu' with various categories like Home, News, Interviews, Sections (Mobile, Broadband and Internet), Consumer Electronic Show, Reviews (Games, Hardware, Services, Software), Features, Opinions, Here's How, Guides (Media Releases), HelpScreen, Jobs, Books, Whitepaper, Slideshows, and Videos. A 'Review Finder' button is at the bottom of the menu. The main content area features a 'Media Release from Apacer' section with a sub-headline 'Apacer officially introduces DDR3 desktop range memory modules in Australia' and a timestamp '17/03/2008 14:50:41'. The text describes the launch of Apacer's DDR3 desktop range, highlighting its performance and capacity. To the right of the main text are social media sharing options for 'Print this story' and 'Digg this story', a 'Zones' section with links to 'Toshiba Notebook Showcase' and 'CareerOne.com.au Resource Centre', and a 'Slideshows' section with a thumbnail image.

Apacer officially introduces DDR3 desktop range memory modules in Australia

17/03/2008 14:50:41

The world's fifth largest memory module maker Apacer Technology has launched the DDR3 for desktop range for Australia market. This high-level DDR3 range offering fully supports the Bearlake desktop chipset from Intel, marking the official entry into the new era of DDR3 with higher performance, lower energy consumption and greater capacity.

The Apacer DDR3 desktop range memory modules have been adopted by Taiwanese and European users and have gained wonderful performance feedback. The compatibility of the DDR3 range from Apacer Technology is certified by leading motherboard manufacturers. Apacer Technology maintains long-term cooperation with motherboard manufacturers and has conducted a series of product functionality
