Apacer 4-Port PH151 USB 2.0 Hub Makes The Clever Connection

16/04/2008 16:00:00

Sydney Australia - April 16 2008 - Far from bleak USB accessory products, Apacer Technology has released the Apacer PH151, a simple design yet revolutionary fun "Y"-shaped USB 2.0 hub. It comes in two funky colours - Brilliant Orange or Designer Black. The Apacer PH151 has four USB ports from side and top connections packed in a compact frame making USB connections effortless. Gone are the days of one USB device blocking two side-by-side USB ports because of the device's different, angles, thickness and direction. PH151 also organises your myriad of USB devices through its outstanding Y-shape design. The PH151 is both useful, excellent value, convenient, and portable weighing only 41 grams.

Features

- Y-shape design makes a better balance when are devices attached on it.
- Offers both bus-powered mode and self-powered mode.
- Automatic connection and speed detection.
- Over-current detection and protection.
- USB 2.0 high speed interface, supports transfer rates up to 480Mbps.
