## Apacer has smart 4-port Hi-Speed USB hub

Published: 16th April 2008 @ 11:04 AM  
Author: [Cameron Wilmot](#)

So, are you running out of [USB](#) 2.0 ports on your motherboard? Apacer has come up with an interesting and well designed product called PH151. The engineers didn't a fantastic job on the design but the marketing department could have come up with a more exciting name!

PH151 is a 4-port Hi-Speed USB hub supporting transfer rates up to 480Mbps but before you begin to yawn, it is rather interesting. Instead of being a regular flat shaped hub design, it is designed using a Y shape, which means there will be no more port blocking by attached pen drives.
