Size: 62.32 sq.cms.

Four ports in one

What: USB hub
Price: \$19.95

CAN'T plug your digital camera, iPod, printer and external hard drive into your computer at once? Some computers simply do not feature enough USB ports, making USB 2.0 hubs like this model from Apacer so convenient. The oddly shaped gadget plugs into just one USB port and gives you four ports in return. Plus, its Y shape lets you plug in devices that might not otherwise sit together comfortably. The Apacer PH151 USB Hub also weighs just 41g, making it a lightweight addition to a laptop bag. **Bluechip InfoTech:** 1300 727 474, www.bluechipt.com.au
