THE PCPP TEST BENCH

We need a huge pile of thrashable hardware here at PCPP, whether we're getting down and dirty with some hardcore tech reviews or blasting our way through the latest games. Fortunately for us there are plenty of manufacturers who love to see their latest tech in the hands of enthusiasts. The following companies support us with their products.

We need the best of the best for our Test Bench Machine.

CPU

INTEL QX6800 2.93GHZ
